

Thermorossi Ecotherm Slim
Price Includes VAT
€2,399.00

Thermorossi presents a new type of pellet heater.
Slim and SlimQuadro, having a smaller depth than the normal heater, are the perfect space saving solution for all locations.
A new unexpected aesthetic design, new ways of heating without changing the domestic habitat.
Original lines that create an original living experience.
Thermorossi alters the confines between space and function. The heater becomes a work of art to be exhibited, a "piece of furniture" to be placed at will.

The large LCD, the user-friendly menu, the voice information volume control, the operating level settings, the language selection, the weekly chronothermostat with 3 daily programming possibilities make it so easy to manage the heater.

There is currently an SEI grant available to homeowners for €800 on approved Wood Pellet Stoves

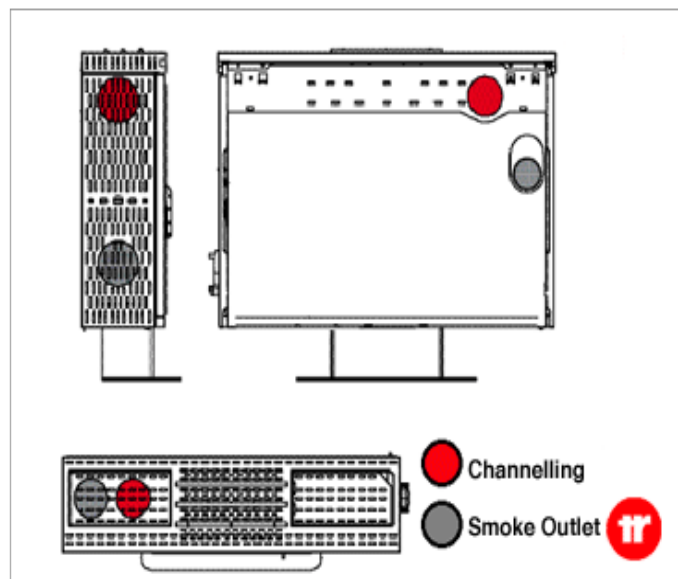

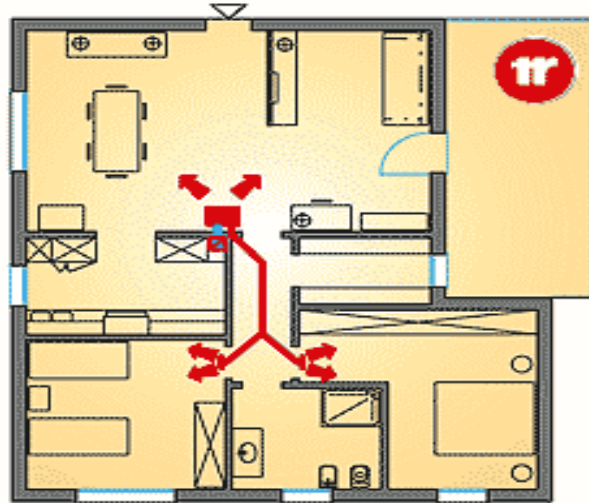

THERMOCOMFORT function: regulates your optimal comfort by positioning the radio control in the central area of the house.

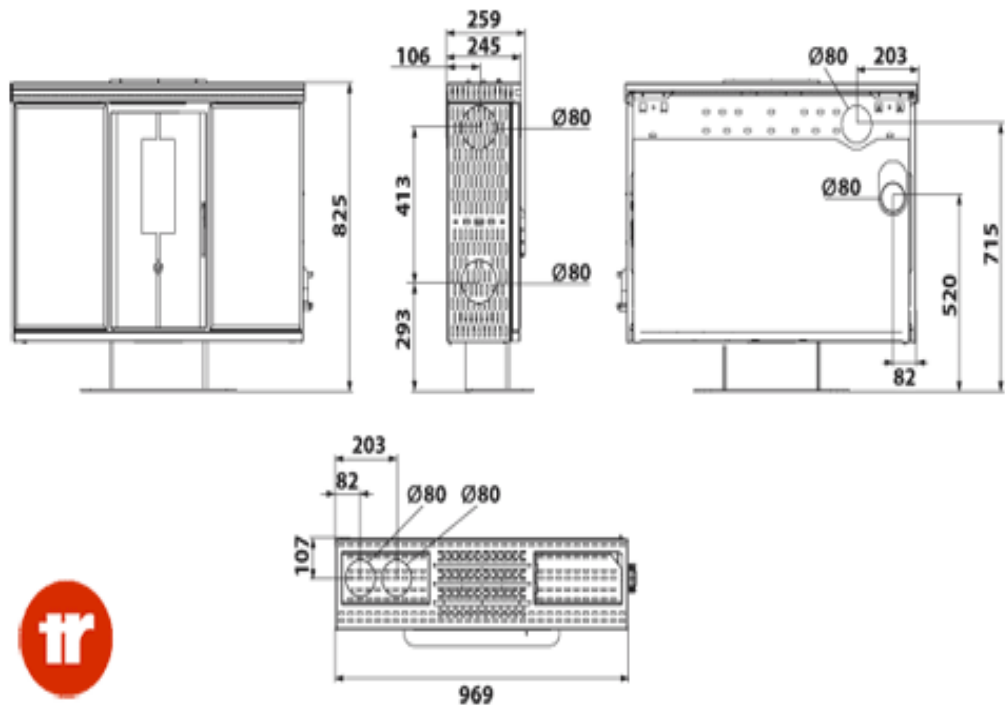

The room temperature is detected far from the heat source by the thermostat integrated in the radio control.

Set your ideal degrees and as the room temperature reaches the set temperature the radio control modulates the power of the heater and adjusts it to the minimum.

This reduces consumption and guarantees the ideal ambient.

	Dimensions (HxWxD)	(mm)	825x969x259
	Heated area	(m³)	189
	Electric consumption (min/max)	(W)	65-130
	Combustion efficiency up to max.		80%
	Min. flue draught pressure	(mbar)	0,09
	High temperature safety thermostat		•
	Flue gas exhaust diameter	(mm)	80
	Pellet hopper capacity	(kg)	12
	Hourly pellet consumption (min/max)	(kg/h)	0,5-1,5*
	Radio control with room temperature thermostat		•
	Voice function		•
	Noise at min.	(db)	36
	Forced ventilation		•
	Optional hot air channelling system		•
	5 levels of temperature control		•
	Weekly programmer		•
	Room thermostat		optional
	G.S.M. Modem system		optional
	Weight	(kg)	93
	Power to the hearth	(kW)	2,5-7,5
